

Somanautics Workshops, Inc.
“Dedicated to exploring inner space.”™

January 18, 2018

To whom it may concern,

I am writing this note to recommend Jim Donak for both his proficiency and professionalism in gross anatomy lab settings. Jim has studied in the lab with me as a participant on my courses for a total of 7 full 6-Day weeks as well as for a 3 week long Intensive Research program over the past 9 years.

Jim is both a knowledgeable teacher in his own right as well as a highly committed student of movement and the human form through explorations both in and out of the laboratory setting. Jim is respectful of his environment, the donor materials, and his fellow participants and often helps folks out around him. His dissection skills are also excellent, having accomplished numerous special projects over the years demonstrating both his passion and commitment for the subject of anatomy and skill with the medium.

I hope you will consider Jim's request, he is an asset to any student hoping to learn anatomy from a teacher with more experience than most in a lab setting.

Sincerely,

Gil Hedley, Ph.D., Director
